

### **V-4 Video Mixer with Effects**

The V-4 is a 4-channel Video Mixer made for portable or fixed installation use. It is ideal for use in nightclubs, places of worship, theaters, and other live performances. The compact design of the V-4 gives you the freedom to make your video sources come alive.

For cutting-edge Multimedia artists, the V-4 offers V-LINK, an exciting new feature from Edirol and Roland that provides for realtime performance control over digital video, for the ultimate in creative expression. V-LINK allows the user to trigger clips, perform video effects and transitions in real-time when connected with the Edirol DV-7PR (sold separately). The V-4 video mixer also has MIDI in/out/through, for real-time or sequenced control of video sources with effects and transitions.

Main Features Include: Video Mixer / Switcher with 4ch input , Independent 2-channel TBC / Frame Synchronizer, Independent 2-channel Digital Effects, Professional quality T-Bar Video Fader, Beat Synchronization between Audio and Video, Over 200 Transition Effects.

The V-4 is equipped with four composite (RCA Pin) inputs plus two S-video (Y/C) inputs. V-4 offers scene transition of the four video sources with Dissolve, Wipes (with a total of about 200 variations), and Switching. The V-4 outputs the same video source to all the three jacks (Composite x 2, S-video x 1), for simultaneous monitoring and displaying, without resorting to external distribution boxes.
